4C SOLUTION OVERVIEW

sales@skywind.com | www.skywind.com

THE KEY TO YOUR BUSINESS VISIBILITY

"I don't want to tell people how fast I fixed a problem. I want to tell them what problems we prevented from impacting the business and what we are doing to tune the technology that supports our business continuity"

R. Arad, Chief Information Officer, Tadiran Group.

WHO WE ARE AND WHAT WE DO

Skywind Software Ltd. is a software development company. Our solution, 4C™ is a cloud service to monitor SAP® landscapes and business processes.

4C™ is a SaaS monitoring and alerting platform for SAP® environments. 4C™ provides detailed alerts in real-time, optimizing day to day activities and routines. 4C™ laser pings the event within seconds of the occurrence and sends alerts to the responsible party.

THE CHALLENGE

Ensure business continuity by providing critical info to the right person on the right time pinpointing the problem.

TOO MUCH TIME AND EFFORT SPENT

Organizations spend substantial resources on maintenance and control of their SAP® operations.

PEOPLE EXPECT REAL-TIME, CONTEXTUAL DATA

Continuous frustration from all levels of users, due to the absence of event monitoring in real-time.

HIDDEN BOTTLENECKS ARE SLOWING DOWN THE BUSINESS

The challenge is to recognize they are coming and prevent them to occur.

THE SOLUTION

Get unprecedented control over your SAP® environment

/ BY SAP® EXPERTS FOR SAP® USERS

4C™ proactively monitors SAP® environments, offering context, visualization and control for the entire service value chain. Created by SAP® experts for SAP® users, 4C™ allows smooth and reliable work mode, providing critical data to the right person on the fly.

/ 4C™ IS ALL ABOUT...

- Independence and personalization
- Accessibility and mobility
- Ease of use and instant focus
- Collective wisdom and intelligence
- Peace of mind, smooth and steady work flow
